

We have more to offer...

Other than our high quality, boutique learning experience; face-to-face approach to all contact hours; high quality qualification; and personalised study experience – we have even more to offer you as a Greenhouse Education student.

We're owned by a Childcare Operator.

You are placed into a Childcare service to complete your practical component as part of this course.

We truly understand what it takes to run a Childcare Centre.

You are given the skills and knowledge to be highly employable within the industry.

We're Specialists in Childcare and After School Care.

Your training is facilitated by staff who operate Childcare facilities and services. We talk the talk and walk the walk.

We run regular classroom sessions.

You receive a balanced education of both practical on-the-job training and theoretical classroom learning.

Your Trainer stays with you and visits you on the job.

Throughout your study, your Trainer will remain your point of contact and will be the one to visit and assess you during your practical component.

We encourage you to meet and study with others in the industry

You get to meet new people in the industry, form new friendships and learn from their experience
